

To whom it may concern,

My name is Cynthia K and I was recently diagnosed with Bell's Palsy that left the right side of my face temporarily paralyzed. When I saw my PCP to be treated he informed me that I had had the Bell's Palsy for over 3 days therefore I could not be treated with steroids. My PCP then referred me to Dr. Frederic Luo to receive acupuncture. Of course not knowing anything about acupuncture or anyone who has had acupuncture I was very scared and skeptical. The thought of having needles placed all over my body and the possibility of it not working raced through my mind. But the thought of my face being distorted forever was even worse. I chose to see Dr. Luo and to my surprise Dr. Luo and staff made me feel very calm and comfortable so I agreed to try the acupuncture. Dr. Luo informed me it would be approximately 10 one half hour treatments. I noticed a significant change after each session and now after 5 treatments I'm very pleased to say my face is back to normal. The acupuncture was calming and pain free. I highly recommend acupuncture and now I'm thinking about trying it for weight loss. Thanks Dr. Luo, I'm smiling again.
